

# 2006 SPECS

## Liebherr

The Liebherr Generation 4 dozers feature increased engine power and improvements to the Litronic drive control system. This allows you to move more material in less time and have more power to the ground throughout the entire dozing process, whether you're doing straight line movement of material or moving material through a turn. Further improvements

include better visibility to the blade corners, and a more ergonomic cabin layout to minimize operator movement and fatigue.

## Liebherr

Model	Net HP	Operating Weight (lbs.)	Drivetrain Type	Blade Capacity Range (cu. yds.)	Blade Width (in.)
PR 724	160	36,729	Hydrostatic	4.15-4.43	126
PR 734	200	47,300	Hydrostatic	4.97-7.27	157
