

2006 SPECS

New Holland

The turbocharged New Holland engines on the D75, D85 and D95 crawler dozers are easy on the environment and provide quieter operation and added pushing power to move more dirt per hour. The sloped engine hood provides an

optimum view in all directions, especially to the blade cutting edge. A high ground clearing, smooth belly design provides maximum mobility and allows operators to work efficiently in the toughest ground conditions. The tilt-over cab/platform enables technicians to access critical hydraulic pumps and powertrain components in less than 20 minutes.

New Holland

Model	Net HP	Operating Weight (lbs.)	Drivetrain Type	Blade Capacity Range (cu. yds.)	Blade Width (in.)
D75 ^a	75	18,200-19,400	Hydrostatic	2.0	98-120
D85 ^a	84	18,900-20,200	Hydrostatic	2.2	104-124
D95 ^b	96	19,600-20,700	Hydrostatic	2.2	104-130

a = Includes LT, WT and LGP versions; b = Includes WT, LGP and XLT versions
